13. **SPECIAL RAIL ALIGNMENT**

Consideration must be given to rail placement in adjacent panels of varying heights (since center rail placement normally relates to panel height). Small height differences also may result in noticeable variation of rail sizes. Therefore, if uniform rail size and placement of unequal adjacent panels is desirable, you must specify one of the following:

- Shutters are to align from the bottom up.
- Shutters are to align from the top down.

A, B, align from top down  
 B, C, align from bottom up  
 C, D, no alignment
