Custom Stained Finishes:

We do not offer standard stain colors.

We require you to send your finish sample for Pincrest to match.
(Minimum 12 square inch sample on wood)

We will custom match your sample and provide our matching control sample for your approval. Our standard topcoat has a satin sheen.

Because of the normal variations in wood color and grain, each piece of wood responds differently to staining. This makes a perfect color match virtually impossible

Our experienced and conscientious finishing department will give your custom stain match carefully given consideration; your sample will be as close as possible to an exact match.

Your written approval is required before we complete your order.

PRIMED AND SANDED:

White or Gray Priming Available – Specify your choice when ordering.

Please send your sample to our address:

Pinecrest Inc.
