

MACHINING OPTIONS

Pincrest offers the following machining options:

1. **Mortised Lockset**: Customer to provide template information from hardware supplier. We do not need the actual hardware. When order is placed, we will request additional specifications. Customer to specify backset dimension. Jamb is not machined for the strike as alignment on-site is required. Additional fitting may also be required.
2. **Double Bore**: Standard face bore is 2-1/8" with 5-1/2" on center. Customer to specify backset dimension. Jamb is not machined for the strike as alignment on-site is required. Additional fitting may also be required.
3. **Single Bore**: Standard face bore is 2-1/8. Customer to specify backset dimension. Jamb is not machined for the strike as alignment on site is required. Additional fitting may also be required.

If machining for additional hardware is needed please contact us with template information. Example: Exit Hardware, Meeting Stile Weather-strip, Power Transfer and others
